Ideas for use in school

It's a good idea to teach all the parts to the whole group.

A *Sam button singer could sing one of the parts several times through. S/he should sing it through solo the first time Then other members of the small group join in the subsequent times.

You can treat this song as a round, and sing each part in turn.

You can make symbols to support the text. It can sometimes be hard to remember the sequence 'find it, build it, use it'. Signing does help.

You only need three chords to add an instrumental accompaniment to this song.
